Bert

For many years we specialized in the growing of high quality small fruit plants and during this time we shipped millions of true to name Raspberry plants to the leading nurseries throughout the United States and Canada. Our business now is mainly retail and we have not only small fruit plants to offer but are growing many acres of Evergreens, Shrubs, Deciduous Trees etc.

V I S I T O R S A L W A Y S W E L C O M E

FREE FROM DISEASE-We send a State Certificate of Nursery Inspection with every order.

GUARANTEE-We use every precaution to have our stock true to name, and if through mistake should any be sent that proved to be otherwise, we will gladly refill order or return the money sent for same.

REFERENCES-Any Bank or Business House in Hoosick Falls, Dun & Bradstreet Inc. and the leading Nurserymen throughout the United States.

NO BUSINESS DONE ON SUNDAY.

B E R R Y P L A N T S

Due to the very severe drought throughout the eastern part of the country during the Summer of 1941 the crop of Raspberry and Strawberry plants is probably not over fifty per cent of normal and we are very fortunate to be able to offer so complete a list of varieties.

UNCLE SAM urges people to grow more fruit and berries.

R A S P B E R R I E S

All of our Raspberry plants have had at least two official inspections and are certified as apparently free from Mosaic and other diseases.

TAYLOR-Originated at the New York State Experimental Station and is proving to be a more profitable variety than Latham. Berries are very large in size, long conical shape, bright attractive in color, have an excellent flavor and ripens at about the same time as Latham. Plants are hardy, strong growers and immensely productive. We recommend it very highly for home gardens or market.

SPECIAL BEERRY PLANT & SHRUB PRICE LIST SPRING 1942 BAKERS NURSERIES HOOSICK FALLS, N.Y.

For many years we specialized in the growing of high quality small fruit plants and during this time we shipped millions of fine to name Raspberry plants to the leading nurseries throughout the United States and Canada. Our business now is mainly retail and we have not only small fruit plants to offer but are growing many acres of Evergreens, Shrubs, Deciduous Trees etc.

BEERRY PLANTS

Due to the very severe drought throughout the eastern part of the country during the summer of 1941, the crop of Raspberry and Strawberry plants is probably not over fifty per cent of normal and we are very fortunate to be able to offer so complete a list of varieties.
UNCLE SAM urges people to grow more fruit and berries.

RASPBERRIES

All of our Raspberry plants have had at least two official inspections and are certified as apparently free from Mosaic and other diseases.
TAYLOR-Originated at the New York State Experimental Station and is proving to be a more profitable variety than Latham. Berries are very large in size, long conical shape, bright attractive in color, have an excellent flavor and ripens at about the same time as Latham. Plants are hardy, strong growers and immensely productive. We recommend it very highly for home gardens or market.

MARCY-the largest of all red raspberries. Berries are colossal in size, medium red in color, long conical shape, mild flavor, of good quality and ripens shortly before Taylor. Well worthy of a trial for the home garden or for market where the winters are not too severe, canes are not quite as hardy as Taylor or Latham.

INDIAN SUMMER-much superior to any of the other so-called ever-bearing red raspberries. Ripens its first crop very early in the season, several days before Taylor and fruits again in the fall right up to severe freezing weather. Fruit is very large, medium red in color and of excellent flavor. Plants are thrifty growers, hardy, disease resistant and are of unusual beauty and attractiveness. They should be in every home garden and many commercial growers are finding them the most profitable raspberry to grow for market.

NEWBURGH-the leading red raspberry in some localities. Fruit is large, very firm and does not crumble, color is bright attractive red and in keeping qualities it has no superior. The plants are vigorous, hardy and very productive. Fruit ripens a few days earlier than Taylor.

LATHAM-originated in Minnesota where the winter are very cold. A great money maker. Bush is hardy and yields immense crops of large berries that bring the highest price in the markets. Fruit ripens over a long period and the last berries are as large as the first. Has been the most famous and widely planted red raspberry in the country, is now being replaced in many places by the better quality varieties that have been developed at the New York State Experimental Station.

CHIEF-a seedling of Latham originating in Minnesota and ripens its fruit about a week earlier than Latham. Produces a large crop during the season when berries are high. Plants are even more hardy than Latham, more resistant to disease and good money makers.

GOLDEN QUEEN-the best yellow raspberry, almost identical with Cuthbert excepting in color. Genuine plants of this variety are very scarce.

SODUS-(Purple)-a cross between Newburgh red and Dundee Black raspberry. The berries are very large in size, attractive in appearance, somewhat tart in flavor, firm in texture and do not crumble. Bush is a strong rank grower, very hardy and tremendously productive.

COLUMBIAN-(Purple)-one of the very best raspberries for canning, fruit is large, has a delicious flavor and one of the most productive of raspberries.

CUMBERLAND-(Black Cap)-generally considered the most satisfactory black raspberry.

NEW LOGAN-(Black Cap)-a heavy yielder ripening a week earlier and more resistant to disease than Cumberland.

B O Y S E N B E R R Y

After growing the Boysenberry for four years, we are thoroughly convinced that it is worthless in our cold climate. It seems to do well farther south. We are offering some nice plants at 15¢ each; \$1.75 per 25; \$4.50 per 100.

and more resistant to disease than Cumberland.
NEW JORGAN (Black Gap)-a heavy yielding ripening a week earlier
tasteful black raspberry.
CUMBERLAND (Black Gap)-generally considered the most satisfactory black raspberry.
COLUMBIAN (Purple)-one of the very best raspberries for canning, fruit is large, has a delicious flavor and one of the most productive of raspberries.
SODUS (Purple)-a cross between Newburgh red and Dundas Black raspberry. The berries are very large in size, attractive in appearance, somewhat tart in flavor, firm in texture and do not crumble. Bush is a strong rank grower, very hardy and tremendously productive.

GUTHBERT excepting in color. Gaining plants of this variety are very scarce.

GOLDEN QUEEN-the best yellow raspberry, almost identical with hardy then Latham, more resistant to disease and good money makers during the season when berries are high. Plants are even more its fruit about a week earlier than Latham. Produces a large crop of large berries that bring the highest price in the market.

LATHAM-originated in Minnesota where the winter are very cold. A great money maker. Bush is hardy as yields immense crops of large berries that bring the highest price in the market.
